

# SIM7

INERT TRAINING PISTOL

Designed by firearm engineers to replicate the form, fit, and function of prolific polymer-framed sidearms, the SIM7 instills unforgettable muscle memory into the user with its true-to-life trigger weight, take-up, and reset. This simulated firearm can be outfitted with the user's choice of a visible laser for standard dry fire training or an infrared laser for integration with Laser Shot's virtual firearm training simulators. Interchangeable laser modules allow the user to switch from visible laser to infrared laser in seconds.

Laser Shot understands that a good training tool requires more than realism and took the development of this product several steps further by receiving ATF Certification #3311/304559 "non-firearm" status for international (non-ITAR) shipping. This answered the market's demand for a low maintenance, user-friendly inert training pistol that can be shipped worldwide.

## FEATURES

- ▶ Metal Slide with Polymer Frame
- ▶ Reliable Striker-Fired Technology
- ▶ Visible or Infrared Laser
- ▶ Interchangeable Laser Modules
- ▶ Rackable Slide
- ▶ True-to-Life Trigger, Realistic Weight, Take-up, Break and Reset
- ▶ Maintenance Friendly with Replaceable Parts
- ▶ Powered by two AAA batteries
